An Active Directory site exists for each office. All of the sites connect to each other by using DEFAULTIPSITELINK.The company plans to open a new office. The new office will have a domain controller and 100 client computers.You install Windows Server 2016 on a member server in the new office. The new server will become a domain controller.You need to deploy the domain controller to the new office. The solution must ensure that the client computers in the new office will authenticate by using the local domain controller.Which three actions should you perform next in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

 QUESTION 42Hotspot QuestionYou have a server named Server1 that runs Windows Server 2016. Server1 has the Windows Application Proxy role service installed. You need to publish Microsoft Exchange ActiveSync services by using the Publish New Application Wizard. The ActiveSync services must use preauthentication.How should you configure Server1? To answer, select the appropriate options in the answer area.

Answer:

 QUESTION 43Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.Drag and Drop QuestionStart of repeated scenario.Your network contains an Active Directory domain named contoso.com. The domain contains a single site named Site1. All computers are in Site1.The Group Policy objects (GPOs)

for the domain are configured as shown in the exhibit.(Click the Exhibit button.)

The relevant users and client computer in the domain are configured as shown in the following table.

Object name	Object type	Object
Computer	Computer	OU4
User1	User	OU4
User2	User	OU2

End of repeated scenario.You plan to enforce the GPO link for A6.Which five GPOs will apply to User1 in sequence when the user signs in to Computer1 after the link is enforced? To answer, move the appropriate GPOs from the list of GPOs to the answer area and arrange them in the correct order.

Answer:

GPOs		Answer Area	

```
