

[2017-NewBraindump2go NS0-158 PDF and VCE Exam Dumps 121Q for 100% Passing NS0-158 Exam][78-88

2017 May New NS0-158 Exam Dumps with VCE and PDF Updated in www.Braindump2go.com Today!100% Real Exam Questions! 100% Exam Pass Guaranteed! 1.|2017 New Version NS0-158 Exam Dumps (PDF & VCE) 121Q&As Download: <http://www.braindump2go.com/ns0-158.html> 2.|2017 New Version NS0-158 Exam Questions & Answers Download: <https://drive.google.com/drive/folders/0B75b5xYLjSSNUWNTQ3dmbXc1d2s?usp=sharing>

QUESTION 78 An administrator is attempting to add two FAS8020 nodes to an existing cluster of eight FAS2552 nodes. They are receiving an error when attempting to join the new nodes. What is causing this error? A. The cluster switch connections have been cabled incorrectly. B. The disk shelves on one of the new nodes are displaying an error. C. The maximum number of nodes is already in the cluster. D. The new nodes are running a newer version of clustered Data ONTAP. Answer: C Explanation: The maximum amount of Nodes in a cluster with FAS2552 is 8. There is no possibility to add two more nodes to the cluster, equal which configuration and type.

QUESTION 79 A customer created a volume with the wrong language code. What should a customer do to correct this problem? A. Delete the volume and create a volume with the correct language code. B. Take the volume offline and change the language code. C. Change the language code on the volume. D. Change the language code on the parent storage virtual machine. Answer: A

QUESTION 80 A customer's Linux Oracle database requires a SAN solution with multiple FC connections for path resiliency and performance. The host has been provisioned with two dual-port FC HBAs, and each HBA is connected to each fabric. Before configuring the storage, what host information should the storage administrator obtain from the customer? (Choose two.) A. if the FC HBAs ports are all configured for an active/passive configuration. B. the amount of cache memory installed in the host C. if the DM-MP with ALUA support is configured on the host D. the WWPNs of all the FC ports in the host Answer: CD

QUESTION 81 Your application team needs to test a NAS volume using production data, but you do not have time to copy the data and do not have a disaster recovery site. In this scenario, which two statements are true when using FlexClone? (Choose two.) A. The clone will update automatically when the parent volume is updated. B. The clone can be made independent by splitting it from the parent volume. C. The clone can be moved to another aggregate keeping space efficiency. D. The clone can be cloned again for multi-phase testing. Answer: BD

QUESTION 82 What is true about a node root volume? A. There is a root volume on every node in a cluster. B. It is the root of a data SVM's namespace. C. You can use vol move to move it to an aggregate on a different node. D. It is the most secure place to store critical user data. Answer: A

QUESTION 83 Which LIF parameter determines the ports that the LIF moves to when the current interface goes offline? A. auto-revert B. ipspace C. failover-group D. netmask Answer: C Explanation: The auto-revert parameter determines, if the LIF moves back. The Failover-group determines, where the lif moves in a failure.

QUESTION 84 Why would you use NetApp Snapshots? A. for data protection B. to increase performance C. for network resiliency D. for storage failover Answer: A Explanation: <http://www.netapp.com/us/products/platform-os/snapshot.aspx>

QUESTION 85 A customer wants to use Storage Efficiency features on volumes used for backup/archive data. The customer is not concerned with performance degradation and is only concerned about storage efficiency. Which three Storage Efficiency features should be turned on to meet these needs? (Choose three.) A. deduplication B. post compression C. storage QoS D. inline compression E. SyncMirror Answer: ABDE Explanation: <http://community.netapp.com/t5/Tech-OnTap-Articles/Storage-Efficiency-in-Clustered-Data-ONTAP/ta-p/86822> <http://www.netapp.com/us/products/platform-os/data-ontap-8/data-efficiency-features.aspx> https://library.netapp.com/ecm/ecm_get_file/ECMP1141092

QUESTION 86 Which two methods would be used to change root-data partitioning on an FAS2500? (Choose two.) A. OnCommand System Manager B. command line interface C. System Setup D. OnCommand Unified Manager Answer: BC Explanation: <https://library.netapp.com/ecmdocs/ECMP1636022/html/GUID-91D088A5-DE0E-42CD-9613-58789AF879AF.html>

QUESTION 87 A customer has LUNs that are being accessed through iSCSI. The applications have experienced increased LUN latency over the last couple of days. Which two components should you review to determine what caused the rise in latency? (Choose two.) A. node CPU utilization B. FC switch performance C. Ethernet network performance D. cluster management switch performance Answer: AC

QUESTION 88 An administrator creates an account for a new user, and wants this user to have limited capabilities accessing SSH. The administrator defined the account, but the user still has full control. Which two settings would the administrator use to correct this problem? (Choose two.) A. the user account settings in OnCommand system Manager B. the user account settings of the admin account C. the user account settings in Windows Active Directory Users and Computers D. the user account settings in the clustershell Answer: AD Explanation: There is no SSH settings in the Windows Active Directory Users and Computers. User account settings can be changed either in the clustershell cli or in OnCommand System manager.
