[2017-Oct.-New100% Real E20-593 Exam Dumps PDF 521Q Free Download in Braindump2go[323-351

2017 Oct. New EMC E20-593 Exam Dumps with PDF and VCE Free Released Today! Following are some new E20-593 Questions: 1.|2017 New E20-593 Exam Dumps (PDF & VCE) 521Q&As Download:https://www.braindump2go.com/e20-593.html 2.|2017 New E20-593 Exam Questions & Answers Download: https://drive.google.com/drive/folders/0B75b5xYLjSSNUXlhUktJN1RnSmM?usp=sharing QUESTION 323An EMC NetWorker backup job has failed 95% of the way through its operation. Which functionality is provided by the checkpoint restart feature? A. The backup can continue from the last known good pointB. The backup can always continue exactly where it left offC. The backup can be merged with data from the last server checkpointD. The backup must be restarted from the beginning Answer: A QUESTION 324Which three components comprise EMC NetWorker's three tier architecture? A. Server, Storage Node and Client B. Master Server, Media Server and ClientC. Server, Storage Agent and ClientD. Cell Manager, Devices and Client Answer: A QUESTION 325The three primary types of EMC NetWorker hosts form an architecture/topology. What is this called? A. EMC NetWorker Data ZoneB. EMC NetWorker Storage DomainC. EMC NetWorker Storage ZoneD. EMC NetWorker Cell Answer: A QUESTION 326Which feature of EMC NetWorker allows multiplexed, heterogeneous data to reside on the same tape? A. OTFB. TARC. CPIOD. ZIP Answer: A QUESTION 327Which EMC NetWorker feature allows for a failed backup to restart at a known good point prior to the backup failure? A. CheckPoint RestartB. Client RetriesC. Scheduled Backup AttemptsD. Restart Window Answer: A QUESTION 328An administrator in an EMC NetWorker environment wants to know the exact backup creation date and time along with the backup level. Which EMCNetWorker functionality should be used to find this information? A. Tracking and reportingB. AgingC. NMC MonitoringD. Daemon log Answer: A QUESTION 329In EMC NetWorker, what best describes the source capacity licensing model? A. Aggregate of a full backup from all sourcesB. Aggregate of differential backups from all sourcesC. Aggregate of incremental backups from all sourcesD. Aggregate of Level 9 backups from all sources Answer: A QUESTION 330A storage administrator backs up an Exchange server to an EMC Data Domain system. The Data Domain system is configured as an advanced file Device. The administrator now wants to create a copy of the backup and send it to tape. The backup job completed at 8pm. The administrator wants the copy to be created at 9pm. Which option should be used? A. Use the Scheduled Cloning attribute to schedule a clone job to start at 9pm.B. Run the nsrclone command at 8pm and the second copy will be directed to tape at 9pm.C. Enable the "clones" attribute in the client's group setting.D. From the Administration window, under Media select Save Sets and then the Query Save Set tab.Create clone copies of the backup at 8pm. Answer: A QUESTION 331Refer to the exhibit. The calendar shows the level backup that was taken on each day. Which data is sent to the backup server on Friday's backup? A. All changes since TuesdayB. All changes since MondayC. All changes since WednesdayD. All changes since Thursday Answer: A QUESTION 332Which method would you use to recover a file to its same location when the entry for that file no longer exists in the client file index? A. Save setB. BrowsableC. RecoverpsmD. Clone Answer: A QUESTION 333The EMC NetWorker software distribution feature is supported on which platform? A. LinuxB. MACC. NetwareD. Open VMS Answer: A QUESTION 334What is a benefit of EMC Networker's Open Tape Format (OTF)? A. Enables storage nodes to be moved to hosts with different OSB. Allows an unlimited number of save streams to be simultaneously written to tapeC. Permits segregation of backup data into a specific set of tape volumesD. Enables backup data to be written and read in the local language of the storage node Answer: A QUESTION 335What is a characteristic of the EMC NetWorker capacity licensing model? A. Easy, unlimited deployment of most features, modules, and options.B. Does not require back end capacity licensing if backing up to Avamar.C. Does not require back end capacity licensing if backing up to Data Domain.D. EMC NetWorker module software is not required to backup supported databases in EMC NetWorker. Answer: A QUESTION 336What EMC NetWorker software component controls the backup device in an EMC NetWorker Data Zone? A. Storage NodeB. ClientC. ServerD. EMC NetWorker Management Console Answer: A QUESTION 337A customer has recently purchased a Data Domain appliance to use with EMC NetWorker as the primary storage. The backup administrator needs to configure EMC NetWorker so that multiple backups and recoveries can be performed from a single device at any given time. What type of device should the backup administrator configure? A. AFTDB. LTOC. FTDD. NFS Answer: A QUESTION 338 Which EMC NetWorker host can belong to multiple data zones? A. ClientB. Storage NodeC. ServerD. Remote Storage Node Answer: A QUESTION 339How does EMC NetWorker respond to an AFTD disk full condition? A. Suspends all saves to that volume and runs nsrim.B. Marks the volume full and terminates the backup.C. Marks the volume full and continues the backup to a new volume.D. Initiates a staging job to move files off the Advance File Type Device (AFTD). Answer: A QUESTION 340 Which protocol is used when performing an EMC NetWorker backup to a cloud device? A. TCPB. UDPC. OSTD. iSCSI

Answer: A QUESTION 341Which type of device is referred to as a BOOST device? A. Data DomainB. File TypeC. Advance File TypeD. Cloud Answer: A QUESTION 342Which directory holds the tracking information for each file backed up by the client "tuba" on EMC NetWorker server "soprano"? A. /nsr/index/tuba/db6B. /nsr/mm/mmvolume6C. /nsr/index/soprano/db6 D. /nsr/index/soprano/mmvolume6 Answer: A QUESTION 343Which window in NMC would the EMC NetWorker backup administrator select to configure a new remote storage node? A. DevicesB. MediaC. ConfigurationD. Monitoring Answer: A QUESTION 344Which backup level requires the fewest number of volumes to restore? A. FullB. Level 5C. Level 1D. Incremental Answer: A QUESTION 345How can an EMC NetWorker administrator achieve a recovery of an EMC NetWorker resource database? A. Perform a browsable recovery of the /nsr/index directoryB. Rebuild the database with nsrck commandC. Recover the SYSTEM save setD. Recover the bootstrap save set with mmrecov Answer: D QUESTION 346Which EMC NetWorker daemon provides client files system information? A. nsrfsraB. nsrexecdC. nsrlcpdD. nsrindexd Answer: A QUESTION 347A backup administrator wants to verify that data was successfully written to an AFTD. Which window in NMC would the administrator select to go gather this information? A. MediaB. DevicesC. ConfigurationD. Monitoring Answer: A QUESTION 348What is a characteristic of how the EMC NetWorker modules integrate with native applications? A. EMC NetWorker module acts as an intermediate layer between EMC NetWorker and the native application.B. The application vendor provides EMC NetWorker module to allow data protection with EMC NetWorker.C. EMC NetWorker module runs on EMC NetWorker server and acts as an intermediate layer for backup data from EMC NetWorker client.D. EMC NetWorker module runs on EMC NetWorker storage node and acts as an intermediate layer for backup data from EMC NetWorker client. Answer: A QUESTION 349Which Microsoft VSS component ensures that the application data is consistent when a shadow copy is created? A. WriterB. RequestorC. ProviderD. Interceptor Answer: A QUESTION 350What is a key feature of the EMC NetWorker Module for Databases and Applications? A. Delivers a unified solution for database applications in a EMC NetWorker environment.B. Supports Exchange and VSSC. Supports VMware features for PowerSnap snapshots.D. Supports Oracle and Microsoft SQL Answer: A QUESTION 351In which order are the steps performend when creating an EMC NetWorker application-based snapshot? A. 1. Freeze application2. Flush buffers3. Take snapshot4. Thaw applicationB. 1. Flush buffers2. Freeze application3. Take snapshot4. Thaw applicationC. 1. Freeze application2. Take snapshot3. Commit writes4. Thaw applicationD. 1. Commit writes2. Freeze application3. Take snapshot4. Thaw application Answer: A !!!RECOMMEND!!!
