Case Study 3 - Contoso, Ltd. (QUESTION 23 - QUESTION 29)OverviewContoso, Ltd. is private company that has 2,000 employees. Contoso has a main office and two branch offices. The main office is located in Seattle. The branch offices are located in Los Angeles and New York City.Existing EnvironmentActive DirectoryThe network contains one Active Directory forest named contoso.com. A child domain named dev.contoso.com is used for development and testing purposes. An Active Directory site with corresponding IP subnets exists for each location.Network InfrastructureThe Seattle office has approximately 1,000 users and 1,000 client computers. The New York City and Los Angeles offices each have approximately 500 users and 500 client computers. Some of the computers run Windows 7 Enterprise. The remaining computers run Windows 8 Enterprise. The Seattle office tests 100 Microsoft Surface RT devices.All servers in the forest run Windows Server 2012 R2. The contoso.com domain contains the servers

shown in the following table.

Host name	Configuration	Location
DC01	• DNS server • DHCP server • Domain controller	Seattle
DC02	• DNS server • Domain controller	Seattle
DC03	• DNS server • DHCP server • Domain controller	Los Angeles
DC04	• DNS server • DHCP server • Domain controller	New York City
Host01	Hyper-V server	Seattle
Host02	Hyper-V server	Seattle
Host03	Hyper-V server	Seattle
WSUS01	Windows Server Update Services (WSUS) server	Seattle
WSUS02	Windows Server Update Services (WSUS) server	New York City
WSUS03	Windows Server Update Services (WSUS) server	Los Angeles
RDS01	• Remote Desktop Web Access (RD Web Access) server • Remote Desktop Session Host (RD Session Host) server	Seattle
RDS02	• Remote Desktop Web Access (RD Web Access) server • Remote Desktop Session Host (RD Session Host) server • Remote Desktop Connection Broker (RD Connection Broker) server	Seattle
RDS03	• Remote Desktop Web Access (RD Web Access) server • Remote Desktop Session Host (RD Session Host) server	Seattle
SC01	Microsoft System Center 2012 R2 Configuration Manager server	Seattle
SC02	Microsoft System Center 2012 R2 Operations Manager server	Seattle
SC03	Microsoft System Center 2012 R2 Virtual Machine Manager (VMM) server	Seattle
Appv01	Microsoft Application Virtualization (App-V) 5.0 Service Pack 2 (SP2) management server and publishing server	Seattle

Update InfrastructureThe existing update infrastructure has the following characteristics:- WSUS01 is configured as the parent upstream update server for WSUS02 and WSUS03.- A server named WSUS04 is located in an isolated test network that is not connected to the production network. WSUS04 has WSUS installed.Configuration Management InfrastructureThe existing configuration management infrastructure has the following characteristics:- Automatic software metering rule generation is enabled and has the default settings configured.- The Configuration Manager client is installed on all of the client computers.- The client status for reporting is scheduled to occur once weekly.Problem StatementsDevelopers in the dev.contoso.com domain frequently conduct stress tests on applications. These tests can last several days. Some developers report that even if they stop System Center-related services on the test computer before they perform the tests, the services restart during the tests, and sometimes cause the tests to fail.RequirementsPlanned ChangesContoso plans to implement the following changes to the application environment:- A new 64-bit application named App3 will be made available to the client computers in the Seattle office.- Infrequently used applications will be uninstalled from all of the client computers.- System Center Updates Publisher 2011 will be used to deploy application updates.- An application named App4 will be deployed to all users.- Contoso plans to implement the following changes to the Configuration Manager environment:- Each office will have customized Configuration Manager client settings.- Software metering will be used to monitor and collect client computer information.- Client computers that are missing a specific registry setting will be moved automatically to a collection named Not Configured.- New client computers in the dev.contoso.com domain will be monitored for compliance, based on a third-party configuration pack supplied by a vendor.- An additional 50 client computers will be added to the dev.contoso.com domain.Technical RequirementsContoso identifies the following technical requirements for the Configuration Manager environment:- Application updates must be available in all of the offices.- All of the configuration packs in use must be customizable.- App4 must be deployed only to the primary device of each user.- All of the client computers must be inventoried by using custom WMI classes.- User device affinity must be automated so that users are associated automatically to the device they use most.- The Configuration Manager client must be installed automatically on all new client computers the first time the computers are authenticated by the domain.The management team identifies the following miscellaneous requirements:- All solutions must minimize administrative effort, whenever possible.- Surface RT devices must have access to App3. QUESTION 23You need to recommend a solution to resolve the issue faced by the developers. What should you include in the recommendation? A. From Configuration Manager, modify the Client Policy client settings.B. From Configuration Manager, modify the Computer Agent client settings.C. From the registry, set the Manual Execution Requested value to 1.D. From the registry, set the Notify Only value to True. Answer: B QUESTION 24You need to recommend a solution to move the client computers to the Not Configured collection.What should you include in the recommendation? A. an automatic deployment ruleB. a compliance ruleC. a task sequenceD. a boundary group Answer: C QUESTION 25The vendor provides you with the new configuration pack.You need to configure the environment to meet the requirements.What should you do? A. Run the Create Configuration Item Wizard and specify the Line of Business category.B. Run the Import Configuration Data Wizard and use the default settings.C. Run the Import Configuration Data Wizard and select Create a new copy of the imported configuration

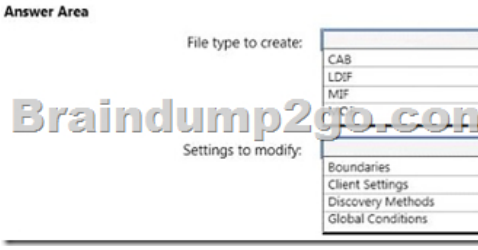

baselines and configuration items.D. Run the Create Configuration Item Wizard and specify the Client category. Answer: C QUESTION 26Hotspot QuestionYou need to recommend a solution to deploy App4.What should you include in the recommendation? To answer, select the appropriate options in the answer area.

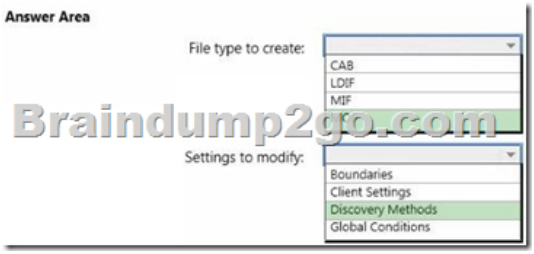

Answer:

QUESTION 27You need to publish the application updates.What is the best server or servers to configure Updates Publisher 2011 to use? More than one answer choice may achieve the goal. Select the BEST answer. A. WSUS01, WSUS02, and WSUS03B. SCO1 onlyC. all of the WSUS serversD. WSUS01 only Answer: DExplanation: https://technet.microsoft.com/en-us/library/hh134775.aspx QUESTION 28Hotspot QuestionYou need to meet the inventory requirements.What should you do? To answer, select the appropriate options in the answer area.

Answer:

QUESTION 29You need to design a solution to deploy App3.What should you do? A. Publish App3 as a RemoteApp program. B. Assign App3 to users by using a Group Policy object (GPO)C. Publish App3 as an App-V package.D. Install App3 locally on the client computers.
