QUESTION 231 Drag and Drop Questions You have a database named database1. Each table in database1 has one index per column. Users often report that creating items takes a long time. You need to perform the following maintenance tasks:- Identify unused indexes.- Identify indexes that need to be defragmented. What should you use? To answer, drag the appropriate function to the correct management task in the answer area. (Answer choices may be used once, more than once, or not at all.)

Functions	Answer Area
sys.dm_db_index_usage_stats	Identify unused indexes.
sys.dm_db_index_operational_stats	Identify indexes that need to be defragmented.
sys.dm_db_index_physical_stats	
sys.dm_db_missing_index_columns	
sys.dm_db_missing_index_details	
sys.dm_db_missing_index_groups	

Answer:

Functions	Answer Area
sys.dm_db_index_usage_stats	Identify unused indexes.
sys.dm_db_index_operational_stats	Identify indexes that need to be defragmented.
sys.dm_db_index_physical_stats	
sys.dm_db_missing_index_columns	
sys.dm_db_missing_index_details	
sys.dm_db_missing_index_groups	

QUESTION 232 Drag and Drop Questions You have a database that contains three tables. The tables are configured as shown in the following table.

Table	Primary key index
SalesOrderHeader	PK_SalesOrderHeader_SalesOrderID
Employee	PK_Employee_EmployeeID
Contact	PK_Contact_ContactID

You have the following query:

```
SELECT soh.SalesPersonID,
       c.FirstName + ' ' + c.LastName AS FullName,
       c.EmailAddress,
       e.Title,
       soh.SubTotal,
       YEAR(soh.OrderDate) AS Year
FROM SalesOrderHeader soh
INNER JOIN Employee e
    ON soh.SalesPersonID = e.EmployeeID
INNER JOIN Contact c
    ON e.ContactID = c.ContactID
WHERE soh.OrderDate >= '1/1/2012'
```

The execution plan for the query is shown in the exhibit. (Click the Exhibit button.)

You need to create one index to minimize the amount of time it takes to execute the query. What should you do? To answer, drag the appropriate columns to the correct locations in the answer area. (Answer choices may be used once, more than once, or not at all.)

Columns

Contact.EmailAddress

Contact.FirstName

Contact.LastName

Employee.Title

SalesOrderHeader.OrderDate

SalesOrderHeader.SalesPersonID

SalesOrderHeader.SubTotal

Answer Area

Indexed Columns

Contact.EmailAddress

Included Columns

Contact.FirstName

Contact.LastName

Answer:

Columns

Contact.EmailAddress

Contact.FirstName

Contact.LastName

Employee.Title

SalesOrderHeader.OrderDate

SalesOrderHeader.SalesPersonID

SalesOrderHeader.SubTotal

Answer Area

Indexed Columns

Contact.EmailAddress

Included Columns

Contact.FirstName

Contact.LastName

QUESTION 233 You have a SQL Server 2012 instance that hosts a single-user database. The database does not contain user-created stored procedures or user-created functions. You need to minimize the amount of memory used for query plan caching. Which advanced server option should you modify? A. Scan for Startup Procs B. Enable Contained Databases C. Optimize for Ad hoc Workloads D. Allow Triggers to Fire Others Answer: C

QUESTION 234 You execute the following code.

```
CREATE TABLE HumanResources.Employee
(
    EmployeeID int IDENTITY(1,1)
    ContactID int NOT NULL
    FOREIGN KEY REFERENCES Person.Contact(ContactID)
    JobTitle varchar(100)
);
GO

CREATE INDEX IX_Employees
ON HumanResources.Employee (JobTitle)
GO
```

After populating the Employees table with 10,000 rows, you execute the following query:

```
SELECT EmployeeID, JobTitle
FROM HumanResources.Employee
WHERE SUBSTRING(JobTitle,1,1) = 'C'
```

You need to reduce the amount of time it takes to execute the query. What should you do? A. Partition the table and use the JobTitle column for the partition scheme. B. Change SUBSTRING(JobTitle,1,1) = 'C' to JobTitle LIKE 'c%' C. Change SUBSTRING (JobTitle, 1,1] = 'c' to LEFT(JobTitle ,1) = 'c'. D. Replace IX_Employees with a clustered index. Answer: B

QUESTION 235 You have a server that has SQL Server 2012 installed. You need to identify which parallel execution plans are running in serial. Which tool should you use? A. Performance Monitor B. Database Engine Tuning Advisor C. Data Profile

<http://msdn.microsoft.com/en-us/library/hh231122.aspx> QUESTION 236You have a SQL Server 2012 database named DB1. You have a backup device named Device1.You discover that the log file for the database is full.You need to ensure that DB1 can complete transactions. The solution must not affect the chain of log sequence numbers (LSNs).Which code segment should you execute? A. BACKUP LCG DB1 TO Device1 WITH COPY_ONLY BACKUP LOG DB1 TO Device1 WITH COPY_ONLYB. BACKUP LOG DB1 TO Device1 BACKUP LOG DB1 TO Device1 WITH NORECOVERYC. BACKUP LOG DB1 TO Device1 WITH NCRECCVERY BACKUP LOG DB1 TO Device1 WITH TRUNCATE_ONLYD. BACKUP LOG D31 TO Device1 WITH TRUNCATE ONLY BACKUP LOG DB1 TO Device1 Answer: DExplanation:
<http://msdn.microsoft.com/en-us/library/ms186865.aspx><http://msdn.microsoft.com/en-us/library/ms179478.aspx>
<http://msdn.microsoft.com/en-us/library/ms190925.aspx> QUESTION 237Drag and Drop QuestionsYou plan to create a new table that will contain a column named Salary. Salary will contain highly sensitive data.Salary must meet the following requirements:- Contain numeric data.- Contain only encrypted data that remains encrypted in memory.You need to identify which encryption type and data type must be used for Salary.Which encryption type and data type should you identity? To answer, drag the appropriate encryption type and data type to the correct identifier in the answer area.

Encryption Types	Answer Area
Transparent data encryption (TDE)	Encryption Type <input type="text"/>
Encrypting File System (EFS)	Data Type <input type="text"/>
Cell-level encryption	
BitLocker Drive Encryption (BitLocker)	
Data Types	
decimal	
varchar	
varbinary	
money	

Braindump2go.com

Answer:

Encryption Types

Transparent data encryption (TDE)

Encrypting File System (EFS)

Cell-level encryption

BitLocker Drive Encryption (BitLocker)

Data Types

decimal

varchar

varbinary

money

Answer Area

Encryption Type

Cell-level encryption

Data Type

varbinary

QUESTION 238You have a Microsoft SQL Azure database named DBAzure1.You create a table in DBAzure1 by using the following script:

```
CREATE TABLE dbo.Customers
(
    CustomerId int NOT NULL,
    CustomerName nvarchar(50) NULL,
    CustomerContact nvarchar(50) NULL,
    CustomerDetails nvarchar(50) NULL,
    CONSTRAINT PK_Customers PRIMARY KEY CLUSTERED (CustomerId)
)
ON [PRIMARY]
GO
```

You need to recommend a solution to ensure that each combination of CustomerContact and CustomerDetails is not duplicated. What should you recommend creating? A. A CHECK constraintB. A filtered indexC. A columnstore indexD. A UNIQUE constraint Answer: D QUESTION 239Drag and Drop QuestionsYour network contains a SQL Server 2012 instance named SQL1. SQL1 contains a database named DB1. DB1 contains three tables.The tables are configured as shown in the following table.

Table name
Table1
Table2
Table3

You plan to create indexes for the tables.You need to identify which type of index must be created for each table. The solution must minimize the amount of time required to return information from the tables.Which type of index should you create for each table? To answer, drag the appropriate index type to the correct table in the answer area.

Index Types	Answer Area
Columnstore Index	Table1
Nonclustered Index	Table2
	Table3

Answer:

Index Types	Answer Area
Columnstore Index	Table1
Nonclustered Index	Table2
	Table3

QUESTION 240 Drag and Drop Questions You create a table that contains the following script:

```
CREATE TABLE dbo.Customers
(
    id int IDENTITY(1,1) NOT NULL,
    FirstName nvarchar(50) NULL,
    LastName nvarchar(50) NULL,
    EmployeeID int NULL,
    CONSTRAINT PK_Customers PRIMARY KEY CLUSTERED
) ON [PRIMARY]
GO
```

You need to prevent duplicate values in the EmployeeID field. Which five code segments should you use? To answer, move the appropriate code segments from the list of code segments to the answer area and arrange them in the correct order.

ADD CONSTRAINT

CHECK

ALTER TABLE dbo.Customers

CK_EmployeeID

UNIQUE

FOREIGN KEY

(EmployeeID)

Answer:

ADD CONSTRAINT

CHECK

ALTER TABLE dbo.Customers

CK_EmployeeID

UNIQUE

FOREIGN KEY

(EmployeeID)

Answer Area

ALTER TABLE dbo.Customers

ADD CONSTRAINT

CK_EmployeeID

UNIQUE

(EmployeeID)

Braindump2go Offers 100% money back guarantee on all products! Our products remain valid for a lifetime! Recently we update our 70-469 Exam Questions since the Microsoft Official Exam Center adds some new questions in 70-469 Exam Dumps. Braindump2go checks all Exam Dumps every day and guarantee all the exam questions are the latest and correct!
