QUESTION 110 You are designing an ASP.NET Web API application. You need to select an HTTP verb to allow blog administrators to remove a comment. Which HTTP verb should you use? A. POST B. PUT C. GET D. DELETE Answer: D

QUESTION 111 You are building an ADO.NET Entity Framework application. You need to validate the conceptual schema definition language (CSDL), store schema definition language (SSDL), and mapping specification language (MSL) files. Which Entity Data Model tool can you use? (Each correct answer presents a complete solution. Choose all that apply.) A. EDM Generator (EdmGen.exe) B. ADO.NET Entity Data Model Designer C. Entity Data Model Wizard D. Update Model Wizard Answer: BC

QUESTION 112 Drag and Drop Question You are developing an ASP.NET Web API action method. The action method must return the following JSON in the message body. { "Name": "Fabrikam", "Vendor Id": 9823, "Items": ["Apples", "Oranges"] } You need to return an anonymous object that is serialized to JSON. What should you do? (To answer, drag the appropriate code segments to the correct location or locations in the answer area. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer:

QUESTION 113 You are designing an ASP.NET Web API application. You need to select an HTTP verb to allow blog administrators to moderate a comment. Which HTTP verb should you use? A. GET B. POST C. DELETE D. PUT Answer: D

QUESTION 114 You are planning to migrate websites from IIS 6 to IIS 7.5. You do not have access to SSH or a VPN. You need to select a deployment tool to securely migrate the websites. Which tool should you use? A. RoboCopy B. Web Deploy C. Microsoft command-line FTP D. xCopy Answer: B

QUESTION 115 You are developing an ASP.NET MVC application. Applications can be deployed to remote servers only by administrators who have elevated privileges. The administrators do not have

access to Visual Studio 2012. You need to select a deployment tool to deploy the application to remote servers for testing. Which tool should you use? A. Copy Web Site Tool B. One-Click Publish C. Publish Web Site Tool D. Web Deployment Package

Answer: D QUESTION 116You develop an ASP.NET MVC application that is secured by using SSL. You are ready to deploy the application to production.The deployment package must include the installation of the SSL certificate.You need to configure the

deployment package to meet the requirement. What should you do?

A. Create a web publish pipeline target file with a custom web deploy target.

B. In the Package/Publish settings of the project, select the All Files in this project option.

C. Extend the CopyAllFilesToSingleFolder target in the project file.

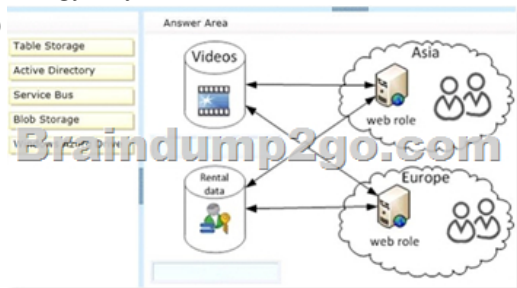

D. In the Build Events settings of the project, configure a pre-build event to

include the SSL certificate. Answer: A QUESTION 117 Drag and Drop Question You are developing a Windows Azure based web application that provides users the ability to rent training videos. The application is deployed to hosted services in Asia and Europe.

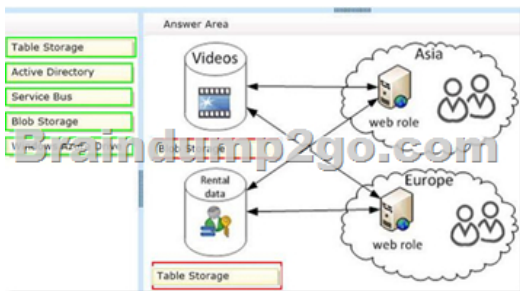

The web application must meet the following requirements:- Video files are large and must be able to be streamed. - Streaming videos requires low latency network connections. - Rental data contains structured information about the user and the video. - Rental permissions are checked every five seconds during video playback. You need to recommend a storage architecture for the

application. What should you do? (To answer, drag the appropriate technologies to the correct location or locations in the answer

area. Each technology may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

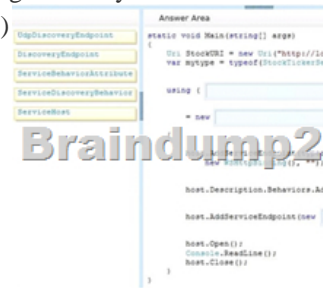

Answer:

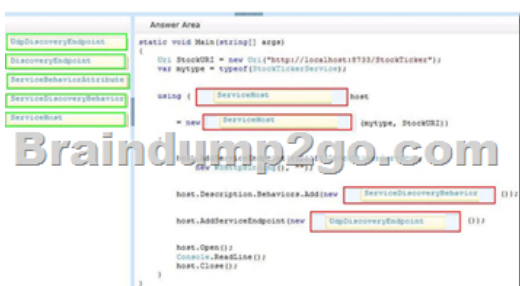

QUESTION 118 Drag and Drop Question You are developing a self-hosted WCF service that returns stock market information. The service must be discoverable by any client application. You need to build the service host. How should you build the host? (To

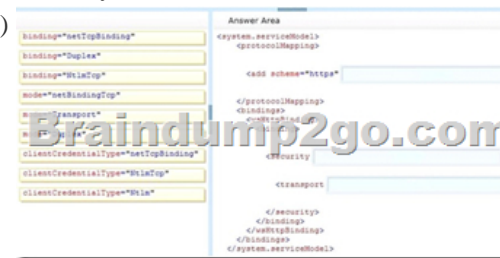

answer, drag the appropriate code segments to the correct location or locations in the answer area. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

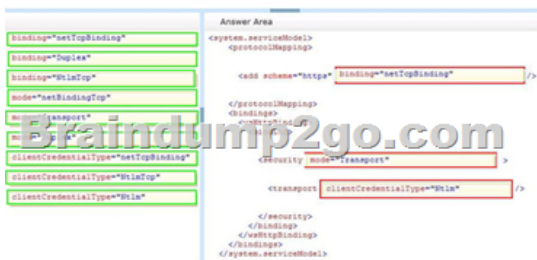

Answer:

QUESTION 119 Drag and Drop Question You are developing a WCF service. You need to implement transport security by using NTLM authentication and NetTcpBindings. Which configuration values should you use? (To answer, drag the appropriate configuration values to the correct location or locations in the answer area. Each configuration value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Answer:

QUESTION 120 You are developing a library to support multiple ASP.NET MVC web applications on a shared server. The library provides implementations of security algorithms. If a problem with any of the security algorithms is discovered, a new version of the library must be created and deployed. Application downtime during the update must be minimized. You need to ensure that the new version of the library will be used by all applications as soon as possible. What should you do? A. Build the web applications and include the security assembly as an embedded resource. When an update is needed, copy the new assembly to the bin directory for the application. B. Sign all assemblies in each application with the same key used to sign the security assembly. When an update is needed, create a new key pair and re-sign all assemblies. C. Build the security assembly as a netmodule in a shared location. Use the assembly linker to merge the netmodule into the assemblies for the application. When an update is needed, update the netmodule in the shared location. D. Install the security assembly in the Global Assembly Cache (GAC). When an update is needed, update the assembly in the GAC. Answer: D Braindump2go Offers PDF & VCE Dumps Download for New Released Microsoft 70-492 Exam! 100% Exam Success Guaranteed OR Full Money Back Instantly!
