2018 May New Microsoft 70-740 Exam Dumps with PDF and VCE Just Updated Today! Following are some new 70-740 Real Exam Questions:1.|2018 Latest 70-735 Exam Dumps (PDF & VCE) 212Q Download:https://www.braindump2go.com/70-740.html2.|2018 Latest 70-735 Exam Questions & Answers Download: **https://drive.google.com/drive/folders/0B75b5xYLjSSNZDBFeXJYTkxyQTQ?usp=sharing**QUESTION 99Your manager has asked you to configure the company Windows Server 2016 domain controller. He wants all new computer accounts to be placed in the General OU, when computers join the domain. Which command should you use to accomplish this?A. DsmoveB. NetdomC. RedircmpD. None of theseAnswer: CExplanation:The Redircmp command is used to redirect the default OU of a newly created object such as a user to another OU.QUESTION 100You want to capture the state, data, and hardware configuration of a running virtual machine. Which checkpoint can be very useful if you need to recreate a specific state or condition of a running virtual machine so that you can troubleshoot a problem?A. ProductionB. StandardAnswer: BExplanation:Standard checkpoints capture the state, data, and hardware configuration of a running virtual machine and are intended for use in development and test scenarios.QUESTION 101Which container type is described below:Provides application isolation through process and namespace isolation technology. This container shares a kernel with the container host and all containers running on the host.A. Hyper-V ContainerB. Windows Server Container**Answer: B**QUESTION 102Your IT company is constantly changing, with new users coming and going throughout the year. One of your common tasks requires the deletion of user accounts for employees who have left the company. Which command can be used to delete user accounts?A. LDIFDEB. DsmodC. DspromoD. Netsh**Answer: A**QUESTION 103One of your team previously opened Hyper-V Manager, selected a virtual machine and followed the Enable Replication wizard. The process was completed successfully and replications were occurring as expected.Several weeks later and you now want to run a planned failover. Which of the following steps is the correct starting point?A. Right-click the primary vM and select Replication > Planned FailoverB. Right-click the replica vM and select Replication > Planned FailoverC. Right-click the primary VM and select Replication > Extend ReplicationD. Right-click the replica VM and select Replication > Test Failover **Answer: A**QUESTION 104You have just finished installing Windows Server 2016 on a new server. Your colleague has informed you that its essential that you must activate Windows Server. Which of the following command line tools can be used to Activate Windows Server?A. Netdom C:windowssystem32slmgr.vbs -atoB. Netsh C:windowssystem32slmgr.vbs -atoC. Ocsetup C:windowssystem32slmgr.vbs -atoD. Cscript C:windowssystem32slmgr.vbs -atoAnswer: DExplanation:The correct answer is Cscript C:windowssystem32slmgr.vbs -atoQUESTION 105With Nano Server some packages are installed directly with their own Windows PowerShell switches (such as -Compute); others you install by passing package names to the -Packages parameter, which you can combine in a comma-separated list.You want to add IIS to your Nano Server, which command should you use?A. -ComputeB. -PackagesC. -ContainersD. -StorageAnswer: BExplanation:IIS is added by using -Packages Microsoft-NanoServer-IIS-Package.QUESTION 106In response to increased needs for higher density and more efficient OS resource utilization, Nano Server is foundational to the modern datacenter and is useful in two core scenarios: As a private cloud infrastructure it's particularly useful for clustered Hyper-V, clustered storage and core networking services scenarios; or as an application platform it's highly optimized for modern distributed and cloud-based apps which leverage containers and micro service architectures.Is the following statement TRUE or FALSE?A local interface with UI support is available for offline management of Nano Servers?A. TRUEB. FALSEAnswer: BExplanation:A local interface with UI support is NOT available for Nano servers. You must administer them remotely using PowerShell.QUESTION 107The Host Guardian Service supports two different deployments of a Guarded fabric (attestation modes). The statement below describes which mode?Guarded hosts that can run Shielded VMs are approved based on their identity, measured boot sequence and code integrity policies so that you can ensure that these hosts are only running approved code.A. Admin-trusted attestationB. TPM-trusted attestationAnswer: BExplanation: TPM-trusted attestation offers the strongest possible protections but also requires more configuration steps. Host hardware and firmware must include TPM 2.0 and UEFI 2.3.1 with secure boot enabled.TPM trusted attestation is the mode Microsoft recommend that you use because it offers stronger assurances but it requires that your Hyper-V hosts have TPM 2.0.QUESTION 108Virtual Network Manager (available from the Hyper-V Manager snap-in) offers three types of virtual networks that you can use to define various networking topologies for virtual machines and the virtualization server.Which type of virtual network is isolated from all external network traffic on the virtualization server, as well any network traffic between the management operating system and the external network.A. Private virtual networkB. Internal virtual network**Answer: A**QUESTION 109You have decided to install Windows Server 2016 by choosing the Server Core Installation option. If you want to install, configure or uninstall server roles

remotely, what tool would you use?A. Any of theseB. Windows PowerShellC. Remote Server Administration Tools (RSAT) D. Server Manager**Answer: A**!!!RECOMMEND!!!1.|2018 Latest 70-740 Exam Dumps (PDF & VCE) 212Q Download:https://www.braindump2go.com/70-740.html2.|2018 Latest 70-740 Study Guide Video: YouTube Video: YouTube.com/watch?v=llOIMW2olOQ
