<https://1drv.ms/f/s!AvI7wzKf6QBjgRBUDX3FFs2-j0p8> QUESTION 61 Note: This question is part of a series of questions that use the same set of answer choices. Each answer choice may be used once, more than once, or not at all. Your network contains a single Active Directory domain. The domain contains computers that run Windows 10 Enterprise. The computers are configured as shown in the following table.

Computer name	Primary user	Computer type
Computer1	User1	Laptop
Computer2	User2	Laptop
Computer3	User3	Laptop
Computer4	User4	Laptop

When User1 works remotely, the user fails to access shared folders on the corporate network. When User2 and User3 work remotely, they successfully connect to the shared folders on the corporate network. You need to ensure that User1 can connect to the shared folders without user interaction. What should you do? A.

Click Turn on password protected sharing. B. Disable Network Discovery. C. Modify the Profile settings of an incoming firewall rule. D. Run the Add-VpnConnectionTriggerApplication cmdlet. E. Run the New-NetFirewallRule cmdlet and specify the -Direction Outbound parameter. F. Run the New-VpnConnection cmdlet. G. Run the Set-NetConnectionProfile cmdlet. H. Run the Set-VPNConnection cmdlet Answer: A QUESTION 62 Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series. Start of repeated scenario Your network contains a single Active Directory domain named adatum.com. The network contains five servers configured as shown in the following table.

Server name	Domain/workgroup	Role
DC1	Adatum.com	Domain controller
Server2	Adatum.com	Member server
Test_Server	Workgroup	File server

All of the servers run Windows Server 2012 R2. Test\_Server has a shared folder named ShareA. Only local users have permissions to ShareA. The network contains a mainframe computer that is administered by using the Telnet protocol. The domain contains four client computers configured as shown in the following table.

Computer name	Primary user
Computer1	User1
Computer2	User2
Computer3	User3
Computer4	User4

All of the client computers run the 64-bit version of Windows. User3 frequently accesses ShareA. Remote Desktop is enabled on Computer4. Your company identifies the following requirements:- Ensure that you can test unsigned device drivers on Computer1.- Enable Credential Guard on Computer2.- Run commands and cmdlets remotely on computer2.- Configure User Account control (UAC) on Computer3 to prompt administrators for credentials when elevated privileges are required.- Ensure that User1 can view and interact with a desktop session of User3.- Ensure that User2 can use Telnet to manage the mainframe. - Ensure that User4 can use Remote Desktop to access Computer4 remotely. End of repeated scenario. You need to meet the requirement of Computer1.

Which tool should you use on Computer1? A. BCD Edit B. Device Manager C. Bootcfg D. System Properties Answer: A QUESTION 63 Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series. Start of repeated scenario Your network contains a single Active Directory domain named adatum.com. The network contains five servers configured as shown in the following table.

A. Install a Universal Windows Platform (UWP) application.B. Modify the settings of a firewall rule.C. Install a Windows feature.D. Modify the membership of a local group. Answer: C QUESTION 66You have a Key Management Service

(KMS) host and an administrative workstation named Computer1. From Computer1, you need to validate the activation status on a computer named Computer2. What should you run? A. Get-RDLICENSEConfiguration computer2 B. slmgr.vbs computer2 /dlv C. winrs.exe -r:Computer2 netdom.exe D. ospv.vbs /tokact:computer2 Answer: A QUESTION 67 You have two computers named Computer1 and Computer2 that run Windows 10. On Computer1, you create a provisioning package named Package1. You plan to apply the provisioning package to Computer2. Which file must be applied to Computer2? A. Package1.icdproj.xml B. Customizations.xml C. Package1.ppkg D. Package1.cat Answer: C QUESTION 68 You have a computer named Computer1 that has the Hyper V feature enabled. You have two virtual machines named VM1 and VM2 hosted on Computer1. VM1 can communicate with VM2 and Computer1. VM1 fails to connect to the Internet- Computer1 can connect to the Internet. You need to ensure that VM1 can connect to the Internet. What should you do? A. On Computer 1, modify the network settings. B. Enable port mirroring on VM1. C. Create an external virtual switch and configure VM1 to use the switch. D. On VM1, select Enable virtual LAN identification. Answer: A QUESTION 69 Hotspot Question A user fails to connect a mouse to a computer. The user sends you the following output. PS C:> Get-PnpDevice -Class Bluetooth

Status	Class	FriendlyName
Unknown	Bluetooth	Device Identification Service
Unknown	Bluetooth	Microsoft Bluetooth LE Enumerator
Unknown	Bluetooth	Microsoft Bluetooth LE Enumerator
Error	Bluetooth	Intel(R) Wireless Bluetooth(R)
Unknown	Bluetooth	Microsoft Bluetooth Enumerator

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in output:

Answer:

A Bluetooth mouse is [answer choice]

ready to pair

ready to pair

The error occurs because [answer choice]

the Bluetooth adapter is disabled in Device Manager

QUESTION 70 Hotspot Question You have three computers configured as shown in the following table.

Computer name	Operating system	Up
Computer1	Windows 7	Ret
Computer2	Windows 8	Ret
Computer3	Windows 8	Ret

You plan to migrate the computers to Windows 10. Which installation option should you use for each computer? To answer, select the appropriate options in the answer area.

Computer1: Custom Upgrade

Computer2: Custom

Computer3: Custom Upgrade

Answer:

Computer1: Custom Upgrade

Computer2: Custom

Computer3: Custom Upgrade
