QUESTION 422Your network contains a server named Server1 and 10 Web servers. All servers run Windows Server 2012 R2.You create a Windows PowerShell Desired State Configuration (DSC) to push the settings from Server1 to all of the Web servers.On Server1, you modify the file set for the Web servers.You need to ensure that all of the Web servers have the latest configurations. Which cmdlet should you run on Server1? A. Restore-DcsConfigurationB. Set DcsLocalConfigurationManagerC. Start-DcsConfigurationD. Get-DcsConfiguration Answer: C **QUESTION 423**Hotspot QuestionYour network contains an Active Directory domain named fabrikam.com. You implement DirectAccess and an IKEv2 VPN. You need to view the properties of the VPN connection. Which connection properties should you view? To answer, select the appropriate connection properties in the answer area.

Answer:

QUESTION 424Your network contains an Active Directory domain named contoso.com. The domain contains servers named Server1 and Server2 that run Windows Server 2012 R2. Server1 has the Active Directory Federation Services server role installed. Server2 is a file server. Your company introduces a Bring Your Own Device (BYOD) policy. You need to ensure that users can use a personal device to access domain resources by using Single Sign-On (SSO) while they are connected to the internal network. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.) A. Enable the Device Registration Service in Active Directory. B. Publish the Device Registration Service by using a Web Application Proxy. C. Configure Active Directory Federation Services (AD FS) for the Device Registration Service. D. Install the Work Folders role service on Server2. E. Create and configure a sync share on Server2. Answer: AC QUESTION 425Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1. Server1 runs Windows Server 2012 R2 and has the Hyper-V server role installed. On Server1, you create and start a virtual machine named VM1. VM1 is configured as shown in the following table.

Setting	Configuration
Minimum RAM	2048 MB
Maximum RAM	2048 MB
Disk type	Fixed size
Disk size	100 GB

You need to recommend a solution to minimize the amount of disk space used for the checkpoint of VM1. What should you do before you create the checkpoint? A. Run the Resize-VHD cmdlet. B. Convert Disk1.vhd to a dynamically expanding disk. C. Shut down VM1. D. Run the Convert-VHD cmdlet. Answer: C QUESTION 426Your network contains a Hyper-V host named Server1 that runs Windows Server 2012 R2. Server1 hosts a virtual machine named VM1 that runs Windows Server 2012 R2. You take a snapshot of VM1, and then you install an application on VM1. You verify that the application runs properly. You need to ensure that the current state of VM1 is contained in a single virtual hard disk file. The solution must minimize the amount of downtime on VM1. What should you do? A. From Hyper-V Manager, delete the snapshot. B. From a command prompt, run dism.exe and specify the /commit-image parameter. C. From a command prompt, run dism.exe and specify the /delete-image parameter. D. From Hyper-V Manager, inspect the virtual hard disk. Answer: A QUESTION 427Your network contains an Active

Directory domain named adatum.com. The domain contains a server named Server1 that runs Windows Server 2012 R2. On a server named Core1, you perform a Server Core Installation of Windows Server 2012 R2. You join Core1 to the adatum.com domain. You need to ensure that you can use Event Viewer on Server1 to view the event logs on Core1. What should you do on Core1? A. Run the Enable-NetFirewallRule cmdlet. B. Run the Disable-NetFirewallRule cmdlet. C. Install Windows Management Framework. D. Install Remote Server Administration Tools (RSAT). Answer: A Explanation: Information regarding IPsec policy changes, etc. can be found in the Event Viewer. Thus you need to enable the NetFirewallRule command. This will allow you to view the event logs.

QUESTION 428 Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1. Server1 runs Windows Server 2012 R2. You need to create a 3-TB virtual hard disk (VHD) on Server1. Which tool should you use? A. New-StoragePool B. Diskpart C. File Server Resource Manager (FSRM) D. New-StorageSubsystemVirtualDisk Answer: B Explanation: You can create a VHD from either the Disk Management snap-in or the command line (diskpart). From the DiskPart command-line tool at an elevated command prompt, run the create vdisk command and specify the file (to name the file) and maximum (to set the maximum size in megabytes) parameters. The following code demonstrates how to create a VHD file at C:\vdisks\disk1.vhdx with a maximum file size of 16 GB (or 16,000 MB). DiskPart Microsoft DiskPart version 6.1.7100 Copyright (C) 1999-2008 Microsoft Corporation. On computer: WIN7DISKPART> create vdisk file="C:\vdisks\disk1.vhdx" maximum=16000

QUESTION 429 Your network contains an Active Directory domain named contoso.com. You create a software restriction policy to allow an application named App1 by using a certificate rule. You need to ensure that when users attempt to execute App1, the certificate for App1 is verified against a certificate revocation list (CRL). What should you do? A. Modify the rule for App1. B. Modify the Trusted Publishers Properties. C. Create a new certificate rule for App1. D. Modify the Enforcement Properties. Answer: B QUESTION 430 You perform a Server Core Installation of Windows Server 2012 R2 on a server named Server1. You need to add a graphical user interface (GUI) to Server1. Which tool should you use? A. The Install-WindowsFeature cmdlet B. The Install-Module cmdlet C. The Install-RoleService cmdlet D. The setup.exe command Answer: A How to 100% pass 70-410 exam? The 70-410 PDF dumps and 70-410 practice test with free VCE player are available on Greatexam now. Get a complete hold of them through Greatexam and boost up your skills. Comparing with others', our 70-410 exam questions are more authoritative and complete. All the 70-410 brain dumps are updated. We ensure you pass 70-410 exam without problem.
