Braindump2go offers you the latest and most up-to-date preparation. In the 70-482 exam, you will find many questions from Microsoft Official Exam Center. The availability of our practice questions is guaranteed.

**QUESTION 121**You are developing a Windows Store app that will access a device's webcam.The app will use a custom control panel to enable camera modifications.You need to specify that the app will use the custom control panel.What should you do in the Visual Studio IDE? A. In the Extension Manager, set a reference to the Windows.Devices.Enumeration.winmd file.B. On the Capabilities tab of the Manifest Designer, select the Webcam check box.C. On the Declarations tab of the Manifest Designer, choose Camera Settings.D. In the Reference Manager, set a reference to the Windows.Devices.Sensors.winmd file. Answer: C

**QUESTION 122**You are developing a Windows Store app by using JavaScript. The app will track oil prices,The app must display oil prices on the lock screen and continue to run while dormant.You plan to use a background task to refresh oil prices in the app. You need to design the background task to provide up-to-date information and to minimize system resource requirements.What should you do? A. Use a ControlChannelTrigger object that has CPU utilization set to Low if the OnBattery condition is true or Normal if the OnCharge condition is true. Persist data to local storage.B. Use a TimeTrigger object to poll for data at one-minute intervals, and push the most recent available data to the app.C. Use a TimeTrigger object to poll for data at five-minute intervals, and push the most recent available data to persistent storage.D. Register the app with a Windows Push Notification Services (WNS) service, and use a Trigger object to deliver the most recent oil quotes to persistent storage. Answer: D

**QUESTION 123**You are developing a fitness app for distribution through the Windows Store.The app must interact with the following USB device classes:- Webcam- Infrared thermometer- Scale- PrinterYou need to modify the app manifest file as required to support the devices. Which two device classes should you include? Each correct answer presents part of the solution. A. AudioVideoB. IrDaC. PersonalHealthcareD. Printer Answer: BC

**QUESTION 124**You develop a Windows Store app that allows users to share pictures with friends. You submit the app to the Windows Store.You need to implement a privacy policy for the app.Which three actions should you perform? Each correct answer presents part of the solution. A. Post the privacy policy to the Windows Dev Center.B. Post the privacy policy to your website.C. Display a link to the privacy policy in the Settings charm for the app.D. Display a link to the privacy policy in the app description section of the Windows Store.E. Display a link to the privacy policy in the app bar for the app. Answer: BCDE

**Explanation:**B: The privacy policy file needs to be hosted somewhere, and you have a few options, but they all have to be online:1. Website2. Azure website 3. Amazon Simple Storage Service (Amazon S3) 4. A cloud drive- A link to your Privacy Policy if you have Internet Connection declared in your capabilities. Forgetting to do this is the most common certification blocker!CD: Your app must have a privacy statement if it is network-capable If your app has the technical ability to transmit data, you must maintain a privacy policy. You must provide access to your privacy policy in the Description page of your app, as well as in the app's settings as displayed in the Windows Settings charm.

**QUESTION 125**You are developing a Windows Store app. You

are adding print capabilities to the app. The app includes the following JavaScript code segment. Line numbers are included for reference only.

```

01 function onPrintTaskRequested(printEvent) {
02     var printTask = printEvent.request.createPrintTask("Print Choices",
03         function (args) {
04             printTask.oncompleted = onPrintTaskCompleted;
05         });
06 }
    
```

The app must display only the following printer options:- Number of copies- Single-sided or double-sided printing You need to configure the printing capabilities for the app. Which code segment should you insert at line 03?

- A. 

```
printTask.options.displayedOptions.append(Window.Graphics.Printing.StandardPrintTaskOptions);
printTask.options.displayedOptions.append(Window.Graphics.Printing.StandardPrintTaskOptions);
```
- B. 

```
printTask.options.displayedOptions.clear();
printTask.options.displayedOptions.append(Window.Graphics.Printing.StandardPrintTaskOptions);
```
- C. 

```
printTask.append.createPrintTaskElement(options);
printTask.append.createPrintTaskElement(options);
printTask.options.displayedOptions.add();
```
- D. 

```
printTask.options.displayedOptions.clear();
printTask.append.createPrintTaskElement(options);
printTask.append.createPrintTaskElement(options);
```

A. Option AB. Option BC. Option CD. Option D Answer: A QUESTION 126 Drag and Drop Question You are developing a Windows Store app. You need to design a testing strategy. Which type of testing should you use to achieve each objective? To answer, drag the appropriate testing types to the correct targets. Each technology may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer Area	
Objective	Type of testing
Test individual modules	
Test the app beyond the limits of the spec	
Ensure that all defects are fixed before deploying the app	

Answer:

Answer Area	
Objective	Type of testing
Test individual modules	unit test
Test the app beyond the limits of the spec	stress test
Ensure that all defects are fixed before deploying the app	regression test

QUESTION 127 Hotspot Question You are developing a Windows Store app by using HTML5 and JavaScript. The app will be used in multiple geographic regions. The default.html file contains the following code segment:

```

<input type="text" placeholder="US"
<br/>
<li>Currency:USD</li>
</ul>
    
```

The resources.resjson file contains the English (en-US) resources shown in the following code segment:

```

{
  "Country": "USA"
}
    
```

The app must access string resources from the resources.resjson file. The data-win-res attribute must be configured in the default.html file to globalize the app. You need to modify the code segment to ensure that the app can be localized with minimum effort. How should you complete the relevant code? (To answer, select the correct code segment from each drop-down list in the answer area.)

Work Area

```

<input type="text" placeholder=""
  data-win-res="{
    'Country'
    'Currency:USD'
    'ListElement1'
    placeholder: 'Country'
    textContent: 'ListElement1'
  }"/>
<br/>
<ul>
  <li data-win-res="{
    'Country'
    'Currency:USD'
    'ListElement1'
    placeholder: 'Country'
    textContent: 'ListElement1'
  }"></li>
</ul>
    
```

Answer:

Work Area

```

<input type="text" placeholder=""
  data-win-res="{
    'Country'
    'Currency:USD'
    'ListElement1'
    placeholder: 'Country'
    textContent: 'ListElement1'
  }"/>
<br/>
<ul>
  <li data-win-res="{
    'Country'
    'Currency:USD'
    'ListElement1'
    placeholder: 'Country'
    textContent: 'ListElement1'
  }"></li>
</ul>
    
```

QUESTION 128 Drag and Drop Question You are developing a Windows Store app that streams photos to and from any Windows-compliant device on the same network. You need to configure the Play To receiver. How should you complete the relevant code? To answer, drag the appropriate code segments to the correct targets. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer Area

```

var receiver;
function startReceiverButton_Click() {
    try {
        if (receiver == null) {
            receiver = new Windows.
            receiver.startAsync().done(function () {
                ...
            });
        }
        catch (e) {
            receiver = null;
            statusDiv.innerHTML = "Receiver Failure";
        }
    }
}
    
```

Answer:

Answer Area

```

connectionName = "Photo Enhancer"
friendlyName = "Photo Enhancer"
Media.PlayTo.PlayToConnection()
var receiver;
function startReceiverButton_Click() {
    try {
        if (receiver == null) {
            receiver = new Windows.
            receiver.startAsync().done(function () {
                ...
            });
        }
        catch (e) {
            receiver = null;
            statusDiv.innerHTML = "Receiver Failure";
        }
    }
}
    
```

QUESTION 129 You are developing a Windows Store app by using JavaScript. The app will be installed on five devices. The app will use certificates to secure communications between the five devices. Information sent through the app must be decrypted only by the intended recipient device. You need to complete the certificate enrollment. What should you do? A. Create a single certificate enrollment request on one device and import the certificate to the other four devices. B. Create a single group certificate enrollment request on one device and share the public and private keys with the other four devices. C. Create a certificate enrollment request on each device and install the respective response on each device. D. Create a single certificate enrollment request on one device and share only the public key with the other four devices. Answer: C

QUESTION 130 Hotspot Question You are developing a Windows Store app that displays all photos from the Pictures library to the user. The app includes the following JavaScript code segment. Line numbers are included for reference only.

```

01 function ReadAll() {
02     var openFiles = Windows.Storage.KnownFolders.picturesLibrary.GetFilesAsync().then
03     (function (files) {
04         var filenames =
05         ...
06     });
07     document.writeIn(filenames);
08 }
09 }
10 }
    
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Answer Area		
Yes	No	Statement
<input type="radio"/>	<input type="radio"/>	Using promises will allow the app to upload photos more quickly.
<input type="radio"/>	<input type="radio"/>	Using then instead of done will allow for throwing of unhandled exceptions.

Answer:

Answer Area		
Yes	No	Statement
<input checked="" type="radio"/>	<input type="radio"/>	Using promises will allow the app to upload photos more quickly.
<input type="radio"/>	<input checked="" type="radio"/>	Using then instead of done will allow for throwing of unhandled exceptions.
