Business RequirementsThe upgraded SharePoint environments must meet the following business requirements:All SharePoint 2013 features must be available to all users when connecting from inside or outside of the corporate network.Users of the Partner Projects site collection must be able to share content from their Microsoft Outlook clients and receive content from external users who send email directly to the site.The Corporate Projects site collection must be available to internal users who connect from outside of the corporate network and must not require a VPN connection.Third-party vendors must be able to read and modify documents. Technical RequirementsYou must meet the following technical requirements:- Before upgrading the Partner Projects site collection, create a duplicate, upgraded copy of the site for review and verification purposes. - Use Active Directory Federation Services (AD FS) 2.0 to authenticate Contoso employees, partners, and customers.- Automate the sign-in experience by using the local AD FS 2.0 servers for AD FS single sign-on (SSO).- Ensure that a web usage report that contains traffic reports, search reports, and inventory reports can be provided for any site.The upgraded SharePoint environments must meet the following technical requirements:- All user profile information that resides in Active Directory must be available in SharePoint Online.- All sites must be able to share a mail-enabled document library that resides in the cloud.- The existing line-of-business application must be consumed as an external content type by using Microsoft Business Connectivity Services (BCS). - The Partner Projects site collection must allow Contoso and Tailspin Toys users to share documents with third-party vendors on an ad-hoc basis, without incurring additional licensing requirements. QUESTION 46You are configuring DNS for SharePoint Online.You need to create the appropriate type of DNS record.Which type of DNS record should you create? A. A DNS CNAME record pointing to sharepoint.contoso.com.B. A DNS CNAME record pointing to contoso.sharepoint.com.C. A DNS A record pointing to the IP address of the SharePoint Online servers.D. A DNS TXT record containing an Office 365 validation code. Answer: B QUESTION 47You need to configure Office 365 to automate the sign-in experience.What should you do? A. Configure AD FS to convert the domain contoso.com to a federated domain.B. Run the New-MsolFederatedDomain-DomainName contoso.com - SupportMultipleDomain Windows PowerShell cmdlet.C. Configure AD FS to add the domain contoso.com as an AD FS federated domain and to support multiple domains.D. Run the Update-MsolFederatedDomain-DomainName contoso.com - SupportMultipleDomain Windows PowerShell cmdlet. Answer: B QUESTION 48You need to meet the requirements for the projects.contoso.com site.Which two actions should you perform? (Each correct answer presents part of the solution.Choose two.) A. Add the Site Mailbox app to the site.B. Create a distribution list, and add the project team members to the distribution list.C. Add all the project team members to the Members group of the site.D. Create an AD security group, and add all the project team members to the security group.E. Email-enable a document library app on the site. Answer: ACExplanation:* From scenario:Users of the Partner Projects site collection must be able to share content from their Microsoft Outlook clients and receive content from external users who send email directly to the siteA Site Mailbox is a shared inbox in Exchange Online that all the members of a SharePoint Online site can access. It is implemented in

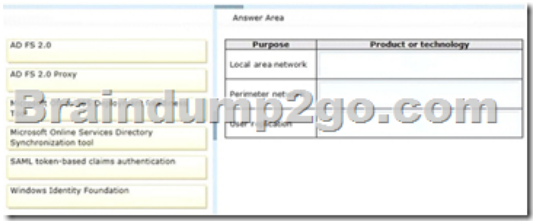

SharePoint Online Preview as what is known as an app. An app is best described as a solution that carries a light footprint and uses standards- based technologies such as HTML5, JavaScript, and OAuth. The Site Mailbox is accessible from the site in which it is created. It allow access to users who are individually listed in the Owners and Members groups of the site - security groups or distribution lists are not supported by Site Mailboxes. The email address of the site mailbox will be generated automatically from the name of the site.Site mailboxes are surfaced in Outlook 2013 and give you easy access to the emails and documents for the projects you care about. Site Mailboxes are listed in the Folder Explorer in Outlook 2013 (the rich client), letting you file emails or documents into the shared project space simply by dragging the email, document, or attachment into the site mailbox. http://blogs.technet.com/b/lystavlen/archive/2012/08/18/new-feature-site-mailboxes-in- sharepoint-online.aspx QUESTION 49Drag and Drop QuestionYou need to provide access to the Corporate Projects site collection to remote internal users.Which authentication mode and site collection URL should you use? (To answer, drag the appropriate answer choices to the correct location or locations in the answer area. Each answer choice may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Answer:
