**QUESTION 21**Hotspot QuestionYou are developing a Windows Store app. The app has the following requirements: - It must allow users to choose contacts by using a ContactPicker class. - It must continue to be responsive while the ContactPicker class is displayed. You need to ensure that the ContactPicker class is displayed to meet the requirements. How should you complete the code segment? (To answer, select the appropriate line of code from each drop-down list in the answer area.)

private void ContactButton\_Click(object sender, RoutedEventArgs e)

async

await

Task

(Contact)

dynamic

ContactInformation contact =

cp.PickSingleContactAsync();

Answer:

private void ContactButton\_Click(object sender, RoutedEventArgs e)

async

await

Task

(Contact)

dynamic

ContactInformation contact =

cp.PickSingleContactAsync();

**QUESTION 22**Drag and Drop QuestionYou are developing a Windows Store app. You need to create an animation that moves a rectangle horizontally across the screen by using a storyboard. What should you do? (To answer, drag the appropriate option to the correct location or locations in the answer area. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

animation

start

"x"

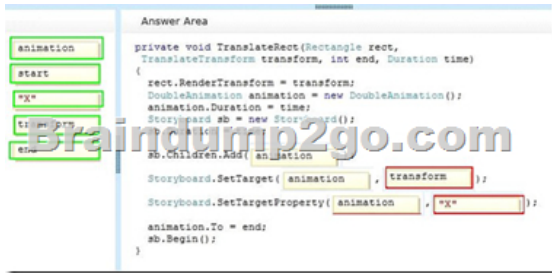

Storyboard

end

**Answer Area**

```
private void TranslateRect(Rectangle rect,
    TranslateTransform transform, int end, Duration time)
{
    rect.RenderTransform = transform;
    DoubleAnimation animation = new DoubleAnimation();
    animation.Duration = time;
    Storyboard sb = new Storyboard();
    sb.Children.Add(animation);
    Storyboard.SetTarget(animation, rect);
    Storyboard.SetTargetProperty(animation, "X");
    animation.To = end;
    sb.Begin();
}
```

Answer:

Case Study 1: Margie's Travel (QUESTION 23 - QUESTION 38)BackgroundYou are developing a Windows Store media sharing app for the sales and marketing team at Margie's Travel. The app will allow team members to download documents and media about current and proposed products and services from the company's cloud-based media manager service. Team members will be able to add new content to the cloud service and to print and share content.Business RequirementsBehavior:- Team members must be able to download product information data sheets, marketing materials, and product demonstration video clips from the company's server. - Team members must be able to select and upload multiple files that contain new and modified content as a batch.- Team members must be able to stream video clips to other devices in the vicinity of the team member's device. The app will not support the streaming of photographs. - The app must allow team members to pause, restart, or cancel uploads and downloads of files. The app must report both the progress and completion status of these operations. It must also return results about upload and download operations.User Interface:- The app must include a photo viewer- When photos are added or deleted in the photo viewer window, they must animate in and out of the field of view. Remaining photos must move to fill the empty space created when photos are deleted. The photo viewer must support semantic zoom.- The app must display information on the lock screen of the device. The information must include text-based alerts and a value indicating the number of pending file downloads.Technical Requirements Behavior:- The company has an existing component named VideoProcessor. This component compresses video clips and performs other processing before the video clips are uploaded to the media manager service. The component was written with managed code. The VideoProcessor component will also be used by Windows Store apps developed in HTML5 and JavaScript. The apps must be able to call the overload of the ProcessVideo() method that accepts a string and a Boolean value as parameters. - When a team member selects a video clip to download, the app must download the file as a background task. After a download has started, the app should maintain the network connection to the server even when the app is suspended.User Interface:- The app must include a custom photo viewer control. The control will be updated frequently and may be deployed separately from the rest of the app. The photo viewer control must support templates and styles.User Interface:- The app must include a custom photo viewer control. The control will be updated frequently and may be deployed separately from the rest of the app. The photo viewer control must support templates and styles.- The app must use a Grid control as the root layout control. The photo viewer must be placed in the second row of the grid.- The appearance of the app must change when the app is in snapped mode. The first row of the root layout grid must not change height. The second row must fill all available space.- Available video clips must be displayed in an extended ListView control class named Downloaded VideoList.- The template for the DownloadedVideoList is already defined. - New video clips should be added to DownloadedVideoList when the DownloadVideoQ method completes.- New video clip items in the DownloadedVideoList should color change periodically to alert the team member.Application StructureRelevant portions of the app files are as follows. (Line numbers in the code segments are included for reference only and include a two-character prefix that denotes the specific file to which they belong.)

```
App.xaml.cs
AP01 CancellationTokenSource();
AP02 private List<DownloadOperation> MyPendingDownloads;
AP03 private async Task HandleMyPendingDownloads (DownloadOperation download,
AP04 {
AP05     MyPendingDownloads.Add(download);
AP06     Progress<DownloadOperation> progressCallback = new
AP07     Progress<DownloadOperation>(DownloadProgress);
AP08     if (start)
AP09     {
AP10         await download.StartAsync().AsTask(cts.Token, progressCallback);
AP11     }
AP12     else
AP13     {
AP14         await download.AttachAsync().AsTask(cts.Token, progressCallback);
AP15     }
AP16 }
AP17 FileOpenPicker picker = new FileOpenPicker();
AP18
AP19 List<BackgroundTransferContentPart> uploadGrp = new
AP20 List<BackgroundTransferContentPart>();
AP21 for (int fileNum = 0; fileNum < files.Count; fileNum++)
AP22 {
AP23     BackgroundTransferContentPart uploadItem = new
AP24     BackgroundTransferContentPart("File" + fileNum,
AP25     files[fileNum].Name);
AP26     uploadItem.SetFile(files[fileNum]);
AP27     uploadGrp.Add(uploadItem);
AP28 }
AP29 BackgroundUploader uploader = new BackgroundUploader();
AP30 await HandleUploadAsync(upload, true);
AP31 }
```

```
VideoProcessor.cs

MC21 }
```

QUESTION 23 Hotspot Question You need to meet the business requirements about downloading and uploading. How should you configure the app? (To answer, select the appropriate options from each dropdown list in the answer area.)

Configure the Application UI settings in Package.appxmanifest.

Lockscreen notifications: 

Tile  
Badge and Tile Text  
Wide Logo Only

Logo files: 

Tile Image Only  
Badge Logo and Tile Image  
Wide Logo and Wide Image

Configure the Declarations settings in Package.appxmanifest.

Add a Background Task declaration and configure the following task types: 

Photo file stream  
Control channel  
User actions  
Device availability  
Playback status

Answer:

Configure the Application UI settings in Package.appxmanifest

Lock screen notifications:

- Tile
- Badge and Tile Text
- Wide Logo Only

Logo files:

- Tile Image Only
- Badge Logo and Tile Image
- Badge Logo and Wide Logo

Configure the Declarations settings in Package.appxmanifest

Add a Background Task declaration and configure support for the following task types:

- Photo file stream
- Control channel
- User actions
- Device availability
- Playback status

QUESTION 24 You need to implement the business requirement to display video clips. Which code segment should you use in the MainPage.xaml file?

```
A. <DownloadedVideoList x:Name="videoList">
  <DownloadedVideoList.Resources>
    <Storyboard x:Name="NewVideoStoryboard">
      <ColorAnimation Storyboard.TargetName="NewVideoBrush"
        Storyboard.TargetProperty="Color" From="Red" To="Green"
        Duration="0:0:8" RepeatBehavior="Forever"/>
    </Storyboard>
  </DownloadedVideoList.Resources>
  <DownloadedVideoList.Background>
    <SolidColorBrush x:Name="NewVideoBrush" Color="Red"/>
  </DownloadedVideoList.Background>
</DownloadedVideoList>

B. <DownloadedVideoList x:Name="videoList">
  <DownloadedVideoList.Resources>
    <Storyboard x:Name="NewVideoStoryboard">
      <ColorAnimation Storyboard.TargetName="NewVideoBrush"
        Storyboard.TargetProperty="Color" From="Red" To="Green"
        AutoReverse="true"/>
    </Storyboard>
  </DownloadedVideoList.Resources>
  <DownloadedVideoList.Background>
    <SolidColorBrush x:Name="NewVideoBrush" Color="Red"/>
  </DownloadedVideoList.Background>
</DownloadedVideoList>

C. <DownloadedVideoList x:Name="videoList">
  <DownloadedVideoList.Transitions>
    <TransitionCollection>
      <EntranceThemeTransition/>
    </TransitionCollection>
  </DownloadedVideoList.Transitions>
</DownloadedVideoList>

D. <DownloadedVideoList x:Name="videoList">
  <DownloadedVideoList.Transitions>
    <TransitionCollection>
      <AddDeleteThemeTransition/>
    </TransitionCollection>
  </DownloadedVideoList.Transitions>
</DownloadedVideoList>
```

A. Option AB. Option BC. Option CD. Option D Answer: A QUESTION 25 You need to implement downloading of media files and other content. Which code segment should you add to App.xaml.cs?

A. private async Task GetPendingDownloadsList()  
{  
 IReadOnlyList<DownloadOperation> downloads = await  
 BackgroundDownloader.GetCurrentDownloadsAsync();  
 if (downloads.Count > 0)  
 {  
 List<Task> myTasks = new List<Task>();  
 for (int i=0; i < downloads.count; i++)  
 {  
 await HandleMyPendingDownloads(downloads[i], true);  
 }  
 await Task.WhenAll(myTasks);  
 }  
}

B. private async Task GetPendingDownloadsList()  
{  
 IReadOnlyList<DownloadOperation> downloads = await  
 BackgroundDownloader.GetCurrentDownloadsAsync();  
 if (downloads.Count > 0)  
 {  
 List<Task> myTasks = new List<Task>();  
 foreach (DownloadOperation download in downloads)  
 {  
 myTasks.Add(HandleDownloadAsync(download, false));  
 }  
 await Task.WhenAll(myTasks);  
 }  
}

C. private GetPendingDownloadList()  
{  
 IReadOnlyList<DownloadOperation> downloads = await  
 BackgroundDownloader.GetCurrentDownloadsAsync();  
 if (downloads.Count > 0)  
 {  
 List<Task> myTasks = new List<Task>();  
 for (int i=0; i < downloads.count; i++)  
 {  
 await HandleMyPendingDownloads(downloads[i], true);  
 }  
 await Task.WhenAll(myTasks);  
 }  
}

D. private Task GetPendingDownloadsList()  
{  
 IReadOnlyList<DownloadOperation> downloads =  
 BackgroundDownloader.CreateDownloadAsync();  
 if (downloads.Count > 0)  
 {  
 List<Task> myTasks = new List<Task>();  
 foreach (DownloadOperation download in downloads)  
 {  
 myTasks.Add(HandleDownloadAsync(download, false));  
 }  
 Task.WhenAll(myTasks);  
 }  
}

A. Option AB. Option BC. Option CD. Option D Answer: B QUESTION 26You need to ensure that the app uploads media and files to the media manager service. What should you do? (Each correct answer presents part of the solution. Choose all that apply.)

A. Insert the following line of code at line AP28.  
IReadOnlyList<UploadOperation> upload =  
 await BackgroundUploader.GetCurrentUploadsAsync();

B. Insert the following line of code at line AP28.  
UploadOperation upload = await uploader.CreateUpload(uri, uploadSrp);

C. Insert the following line of code at line AP28.  
IReadOnlyList<StorageFile> files = await picker.PickMultipleFilesAsync()  
();

D. Insert the following line of code at line AP19.  
IReadOnlyList<StorageFile> files = await picker.PickSingleFilesAsync()  
();

A. Option AB. Option BC. Option CD. Option DE. Option E Answer: CD QUESTION 27Drag and Drop QuestionYou need to implement the photo viewer page to meet the business requirements. How should you complete the code segment? (To answer, drag the appropriate [source or sources] to the correct location or locations in the answer area.)

<RepositionThemeTransition/>  
<AddDeleteThemeTransition/>  
<ReorderThemeTransition/>  
<EntranceThemeTransition/>  
<FlipView/>  
<WrapGrid/>

Answer Area  
<Button Content="Add New Photo" Click="btnAdd\_Click"/>  
<Button Content="Remove Selected Photo" Click="btnDelete\_Click  
<ItemsControl Grid.Row="1" x:Name="rectangleItems"  
<ItemsControl.ItemContainerTransition  
<TransitionCollection  
</TransitionCollection>  
</ItemsControl>  
<ItemsPanelTemplate  
</ItemsPanelTemplate>  
</ItemsControl>

Answer:

<RepositionThemeTransition/>  
<ReorderThemeTransition/>  
<EntranceThemeTransition/>  
<FlipView/>  
<WrapGrid/>

Answer Area  
<Button Content="Add New Photo" Click="btnAdd\_Click"/>  
<Button Content="Remove Selected Photo" Click="btnDelete\_Click  
<ItemsControl Grid.Row="1" x:Name="rectangleItems"  
<ItemsControl.ItemContainerTransition  
<TransitionCollection  
</TransitionCollection>  
</ItemsControl>  
<ItemsPanelTemplate  
</ItemsPanelTemplate>  
</ItemsControl>

QUESTION 28 You need to implement a custom control to display thumbnail images of video clips.

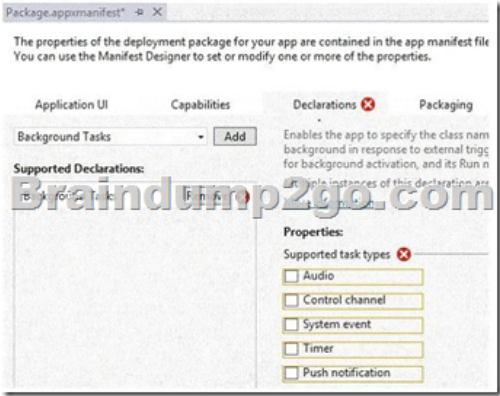

```
A. public sealed class DownloadedVideoList: Fl
{
    public DownloadedVideoList ()
    {
        this.DefaultStyleKey = typeof(ListView)
    }
}

B. public sealed class DownloadedVideoList: Fl
{
    public DownloadedVideoList ()
    {
        this.DefaultStyleKey = typeof(Downloade
    }
}

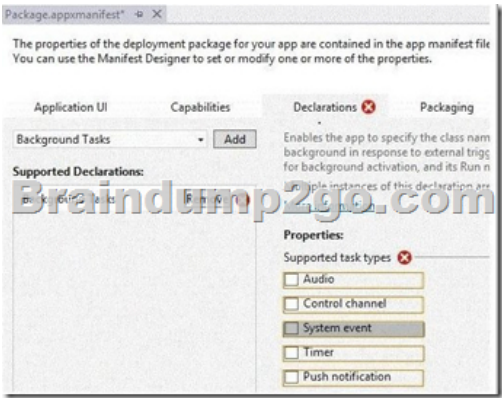

C. public sealed class DownloadedVideoList: Li
{
    public DownloadedVideoList ()
    {
        this.DefaultStyleKey = typeof(Downloade
    }
}

D. public sealed class DownloadedVideoList: Li
{
    public DownloadedVideoList ()
    {
        this.DefaultStyleKey = typeof(ListView)
    }
}
```

Which code segment should you use? A. Option A B. Option B C. Option C D. Option D Answer: C QUESTION 29 Hotspot Question You need to configure the app manifest to support the file download requirements. Which task type property should you specify? (To answer, select the appropriate property in the answer area.)

Answer:

QUESTION 30 You need to implement the requirements for the playback of media. What should you do? (Each correct answer presents part of the solution. Choose all that apply.) A. Add the following line of code at line MC02. private void ShowPlayTo() { Windows.Media.PlayTo.PlayToManager.ShowPlayToUI(); } B. Add the following line of code at line MC06. ptMgr.DefaultSourceSelection = false; C. Add the following line of code at line MC10. ptMgr.PlayRequested += SourceRequestHandler; D. Add the following line of code at line MC05. ptMgr.SourceRequested += SourceRequestHandler; Answer: BD Braindump2go Latest 70-485 Exam Dumps Released! 100% Real Questions - Dumps Qualification is the secret of Success!
