

Free Greatexam Microsoft 70-410 PDF Dumps With The Latest Update Exam Questions(171-180)

70-410 easy pass guide: Preparing for Microsoft 70-410 exam is really a tough task to accomplish. However, Greatexam delivers the most comprehensive preparation material, covering each and every aspect of 70-410 exam curriculum. And our exam preparation material is rich in variety. We offer 70-410 PDF format and 70-410 practice test with free VCE player. Both are the newest version. We ensure you pass 70-410 exam without any problem. QUESTION 171 Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2012 R2. You create a new inbound rule by using Windows Firewall with Advanced Security. You need to configure the rule to allow Server1 to accept unsolicited inbound packets that are received through a network address translation (NAT) device on the network. Which setting in the rule should you configure? A. Edge traversal B. Authorized computers C. Interface types D. Remote IP address Answer: A QUESTION 172 Your network contains an Active Directory domain named contoso.com. The domain contains a member server named Server1. Server1 runs Windows Server 2012 R2 and has the File Server server role installed. On Server1, you create a share named Documents. You need to ensure that users can recover files that they accidentally delete from Documents. What should you do? A. Enable shadow copies by using Computer Management. B. Modify the Startup type of the Volume Shadow Copy Service (VSS) by using the Services console. C. Create a recovery partition by using Windows Assessment and Deployment Kit (Windows ADK). D. Create a storage pool that contains a two-way mirrored volume by using Server Manager. Answer: A QUESTION 173 You have a server named Server1 that runs a Server Core installation of Windows Server 2012 R2. Server1 is configured to obtain an IPv4 address by using DHCP. You need to configure the IPv4 settings of the network connection on Server1 as follows: - IP address: 10.1.1.1 - Subnet mask: 255.255.240.0 - Default gateway: 10.1.1.254 What should you run? A. netsh.exe B. netcfg.exe C. msconfig.exe D. ipconfig.exe Answer: A QUESTION 174 Your network contains an Active Directory domain named contoso.com. The domain contains three member servers. The servers are configured as shown in the following table.

Server name	Operating system
Server1	Windows Server 2012 R2
Server2	Windows Server 2012 R2
Server3	Windows Server 2012 R2

All client computers run Windows 8. All client computers receive updates from Server2. On Servers, you add a shared printer named Printer1. Printer1 uses a Type 4 driver that is not included in the Windows 8 installation media. You need to ensure that when users connect to the printer for the first time, the printer driver is installed automatically on their client computer. What should you do? A. From the Windows Deployment Services console on Server1, add the driver package for Printer1. B. From the Update Services console on Server2, import and approve updates. C. From Windows PowerShell on Server3, run the Add-PrinterDriver cmdlet. D. From the Print Management console on Server3, add additional drivers for Printer1. Answer: D QUESTION 175 Your network contains an Active Directory domain named contoso.com. The domain contains 20 computer accounts in an organizational unit (OU) named OU1. A user account named User1 is in an OU named OU2. You are configuring a Group Policy object (GPO) named GPO1. You need to assign User1 the Back up files and directories user right to all of the computer accounts in OU1. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.) A. Link GPO1 to OU1. B. Link GPO1 to OU2. C. Modify the Delegation settings of GPO1. D. From User Configuration in GPO1, modify the security settings. E. From Computer Configuration in GPO1, modify the security settings. Answer: AE QUESTION 176 You have an existing Active Directory site named Site1. You create a new Active Directory site and name it Site2. You need to configure Active Directory replication between Site1 and Site2. You install a new domain controller. You create the site link between Site1 and Site2. What should you do next? A. Use the Active Directory Sites and Services console to configure a new site link bridge object. B. Use the Active Directory Sites and Services console to decrease the site link cost between Site1 and Site2. C. Use the Active Directory Sites and Services console to assign a new IP subnet to Site2. Move the new domain controller object to Site2. D. Use the Active Directory Sites and Services console to configure the new domain controller as a preferred bridgehead server for Site1. Answer: C QUESTION 177 Your company has an Active Directory forest. Not all domain controllers in the forest are configured as Global Catalog Servers. Your domain structure contains one root domain and one child domain. You modify the folder permissions on a file server that is in the child domain. You discover that some Access Control entries start with S-1-5-21 and that no account name is listed. You need to list the account names. What should you do? A. Move the RID master role in the child domain to a domain controller that holds the Global Catalog. B. Modify the schema to enable replication of the friendlynames attribute to the Global Catalog. C. Move the RID master role in the child domain to a domain controller that does not hold the Global Catalog. D.

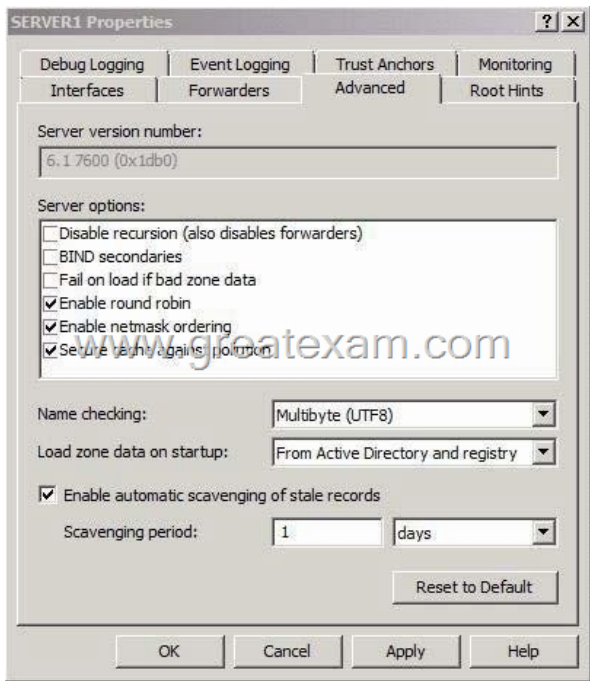

Move the infrastructure master role in the child domain to a domain controller that does not hold the Global Catalog. Answer: D

QUESTION 178 Your company has an Active Directory domain. You log on to the domain controller. The Active Directory Schema snap-in is not available in the Microsoft Management Console (MMC). You need to access the Active Directory Schema snap-in. What should you do? A. Register Schmmgmt.dll. B. Log off and log on again by using an account that is a member of the Schema Admins group. C. Use the Ntdsutil.exe command to connect to the schema master operations master and open the schema for writing. D. Add the Active Directory Lightweight Directory Services (AD/LDS) role to the domain controller by using Server Manager. Answer: A

QUESTION 179 Your network contains a domain controller that is configured as a DNS server. The server hosts an Active Directory-integrated zone for the domain. You need to reduce how long it takes until stale records are deleted from the zone. What should you do? A. From the configuration directory partition of the forest, modify the tombstone lifetime. B. From the configuration directory partition of the forest, modify the garbage collection interval. C. From the aging properties of the zone, modify the no-refresh interval and the refresh interval. D. From the start of authority (SOA) record of the zone, modify the refresh interval and the expire interval. Answer: C

Explanation: Scavenging automates the deletion of old records. When scavenging is enabled, then you should also change the no-refresh and refresh intervals of the aging properties of the zone else it may take too long for stale records to be deleted and the size of the DNS database can become large and have an adverse effect on performance.

QUESTION 180 You have an Active Directory domain named contoso.com. You have a domain controller named Server1 that is configured as a DNS server. Server1 hosts a standard primary zone for contoso.com. The DNS configuration of Server1 is shown in the exhibit. (Click the Exhibit button.) You discover that stale resource records are not automatically removed from the contoso.com zone. You need to ensure that the stale resource records are automatically removed from the contoso.com zone. What should you do?

A. Set the scavenging period of Server1 to 0 days. B. Modify the Server Aging/Scavenging properties. C. Configure the aging properties for the contoso.com zone. D. Convert the contoso.com zone to an Active Directory-integrated zone. Answer: C

If you want to prepare for 70-410 exam in shortest time, with minimum effort but for most effective result, you can use Greatexam 70-410 Practice Test which simulates the actual testing environment and allows you to focus on various sections of 70-410 Exam. Our candidates walk into the testing room as confident as a Certification Administrator. So you can pass the exam without any question.
