Pass 70-410 Exam By Training Greatexam New Microsoft 70-410 VCE And PDF Dumps(251-260)

[Easy way to pass 70-410 exam] The Microsoft 70-410 questions and answers in PDF on Greatexam, is the most reliable guide for 70-410 exam. Comparing with others', our 70-410 practice test are more authoritative and complete. We provide the latest full version of 70-410 PDF and VCE dumps with new real questions and answers to ensure your 70-410 exam 100% pass. QUESTION 251 Hotspot Question Your network contains two Active Directory forests named contoso.com and adatum.com. A two-way forest trust exists between the forests. You have custom starter Group Policy objects (GPOs) defined in contoso.com. You need to ensure that the same set of custom starter GPOs are available in adatum.com. In the table below, identify which action must be performed for the starter GPOs container in each forest. Make only one selection in two of the rows. Each correct selection is worth one point.

Answer:

Action	Starter GPOs container in contoso.com	Starter GPOs container in adatum.com
Copy	●	○
Back up	○	○
Paste	○	●
Restore from backup	○	○
Import settings	○	○

QUESTION 252 Hotspot Question You have a server named Server1 that runs Windows Server 2012 R2. Server1 is a member of a workgroup. You need to ensure that only members of the Administrators group and members of a group named Group1 can log on locally to Server1. Which settings should you modify from the Local Security Policy? To answer, select the appropriate settings in the answer area.

- Security Settings
  - ▷ Account Policies
  - ▷ Local Policies
  - ▷ Windows Firewall with Advanced Security
  - Network List Manager Policies
  - ▷ Public Key Policies
  - ▷ Software Restriction Policies
  - ▷ Application Control Policies
  - ▷ IP Security Policies on Local Computer
  - ▷ Advanced Audit Policy Configuration

Answer:

QUESTION 253 You have a server named Server1. Server1 runs Windows Server 2012 R2 and is located in a perimeter network. You need to configure a custom connection security rule on Server1. The rule must encrypt network communications across the Internet to a computer at another company. Which authentication method should you configure in the connection security rule? A.   Advanced B.   User (Kerberos V5) C.   Computer (Kerberos V5) D.   Computer and user (Kerberos V5) E.   Default Answer: A QUESTION 254 Your network contains two Active Directory forests named contoso.com and adatum.com. All servers run Windows Server 2012 R2. A one-way external trust exists between contoso.com and adatum.com. Adatum.com contains a universal group named Group1. You need to prevent Group1 from being used to provide access to the resources in contoso.com. What should you do? A.   Modify the Managed By settings of Group1. B.   Modify the Allowed to Authenticate permissions in adatum.com. C.   Change the type of Group1 to distribution. D.   Modify the name of Group1. Answer: B QUESTION 255 Your network contains an Active Directory forest named contoso.com. The forest contains a child domain named corp.contoso.com. The network has Microsoft Exchange Server 2010 deployed. You need to create a mail-enabled distribution group. Which type of group should you create? A.   Domain local B.   Global C.   Local D.   Universal Answer: D QUESTION 256 Your network contains an Active Directory forest named contoso.com. The forest contains a single domain. The domain contains two domain controllers named DC1 and DC2 that run Windows Server 2012 R2. The domain contains a user named User1 and a global security group named Group1. You need to add a new domain controller to the domain. You install Windows Server 2012 R2 on a new server named DC3. Which cmdlet should you run next? A.   Add-AdPrincipalGroupMembership B.   Install-AddsDomainController C.   Install WindowsFeature D.   Install AddsDomain E.   Rename-AdObject F.   Set-AdAccountControl G.   Set-AdGroup H.   Set-User Answer: C QUESTION 257 Your network contains an Active Directory forest named contoso.com. The forest contains a single domain. The domain contains two domain controllers named DC1 and DC2 that run Windows Server 2012 R2. The domain contains a user named User1 and a global security group named Group1. User1 logs on to a client computer named Computer1. You need to disable the computer account of Computer1. Which cmdlet should you run? A.   Add-AdPrincipalGroupMembership B.   Install-AddsDomainController C.   Install WindowsFeature D.   Install AddsDomain E.   Rename-AdObject F.   Set-AdAccountControl G.   Set-AdGroup H.   Set-User Answer: F QUESTION 258 Your network contains an Active Directory forest named contoso.com. The forest contains a single domain. The domain contains two domain controllers named DC1 and DC2 that run Windows Server 2012 R2. The domain contains a user named User1 and a global security group named Group1. You reconfigure DC2 as a member server in the domain. You need to add DC2 as the first domain controller in a new domain in the forest. Which cmdlet should you run? A.   Add-AdPrincipalGroupMembership B.   Install-AddsDomainController C.   Install WindowsFeature D.   Install AddsDomain E.   Rename-AdObject F.   Set-AdAccountControl G.   Set-AdGroup H.   Set-User Answer: D Explanation: http://technet.microsoft.com/en-us/library/hh974722.aspx QUESTION 259 Your network contains an Active Directory domain named contoso.com. The domain contains a member server named Server1. Server1 runs Windows Server 2012 R2 and has the Hyper-V server role installed. You create an external virtual switch named Switch1. Switch1 has the following configurations: - Connection type: External network - Single-root I/O visualization (SR-IOV): Enabled - Ten virtual machines connect to Switch1. You need to ensure that all of the virtual machines that connect to Switch1 are isolated from the external network and can connect to each other only. The solution must minimize network downtime for the virtual machines. What should you do? A.   Change the Connection type of Switch1 to Internal network. B.   Change the Connection type of Switch1 to Private network. C.   Remove Switch1 and recreate Switch1 as an internal network. D.   Remove Switch1 and recreate Switch1 as a private network. Answer: D QUESTION 260 You have a Hyper-V host named Server1 that runs Windows Server 2012 R2. Server1 hosts a virtual machine named VM1 that runs Windows Server 2012 R2. VM1 has several snapshots. You need to modify the snapshot file

location of VM1. What should you do? A.   Right-click VM1, and then click Export... B.   Modify the Hyper-V settings. C. Delete the existing snapshots, and then modify the settings of VM1. D.   Shut down VM1, and then modify the settings of VM1. Answer: C If you want to prepare for 70-410 exam in shortest time, with minimum effort but for most effective result, you can use Greatexam 70-410 Practice Test which simulates the actual testing environment and allows you to focus on various sections of 70-410 Exam. Our candidates walk into the testing room as confident as a Certification Administrator. So you can pass the exam without any question. http://www.greatexam.com/70-410-exam-questions.html
